

# M R Agraulic Experts

*WE DESIGN THE FUTURE OF WATER*

# WHAT WE DO?

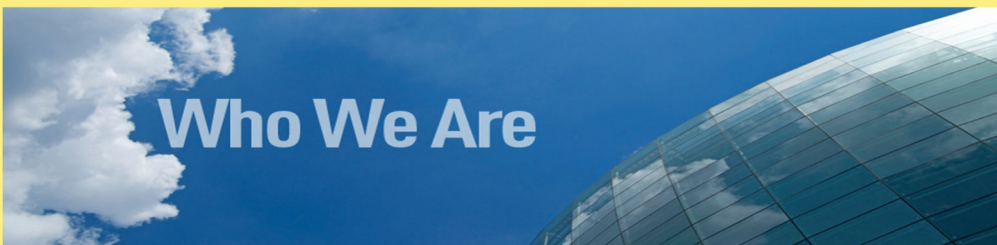

M.R. Agraulic Experts provides proficient, state of the art, result oriented technical consultancy services from concept identification to design, detailing, planning & construction. Our assortment of services also encompasses survey, estimation, bid preparation, as well as a range of infrastructure support services including project management and contract administration.

With latest modern technical knowledge of young engineers as well as experience of senior engineers, M.R. Agraulic Experts has evolved relevant cost effective, environment friendly, sustainable, innovative design and engineering solutions. It is always our aim to evolve design & engineering system uniquely suited to owner designated objectives and resources.

Irrespective of the type and magnitude of the project, M.R. Agraulic Experts endeavor has always been to evolve a totally comprehensive solution which is not only technically sound but also cost beneficial. This is achieved by total involvement with the project backed by modern technology.

M.R. Agraulic Experts has interest to work with a widely diversified group of clients ranging from governments to public authorities, international organizations, architects of national repute, Industries and business houses.

# WHO WE ARE ?

M.R. Agraulic Experts is an emerging consulting firm with a group of dedicated professional, energetic, young and experienced technocrats in the field of water and hydraulic sector with proven expertise in civil, environmental, structural and agriculture engineering. We are engineers, designers, scientists, planners, surveyors and project managers, but above all – we are a team dedicated to delivering smart outcomes for our clients, the community and future generations.

# OUR VIEW POINT

We must save water today so that it will be available to us in the future. We need to think of future generations, people who will not have a sufficient supply of water unless we become more concerned with how we use our water today. There are many things that we can do to help preserve water. These are not things that are hard. All it takes is a little bit of extra effort, and soon it will be second nature. Save the water, its all we've got!

Looking to the need of hour, M.R. Agraulic Experts understands its responsibility towards this most vital issue, accordingly our all technical solutions are given to the client considering best economical use of the available such natural commodity like water which confirm our promise **“WE DESIGN THE FUTURE OF WATER”**

# OUR SERVICES

**Irrigation System**  
**Environment Engineering**  
**Drinking Water Management**  
**Waste Water Management**

[www.agraulic.com](http://www.agraulic.com)

IRRIGATION

**Drip Irrigation system**

**Sprinkler Irrigation system**

**Lift Irrigation system**

**Landscape Irrigation system**

**Micro Irrigation system for Greenhouse**

**Tea and coffee garden Irrigation system**

ENVIRONMENTAL ENGINEERING

**Rain water harvesting system**

**Dust suppression system**

**Mist spraying system**

**Dewatering system for water logged areas**

**Storm water Management**

## DRINKING WATER MANAGEMENT

Design of Urban and Rural water supply schemes

Forecast of future population

Selection of sustainable source (Ground water or surface water) for drinking water

Water treatment – Slow sand and rapid sand filter plants with aeration, clarification and disinfection

Pumping station

Water conveyance – trunk main and rising mains

Water storage tanks

Water distribution

Plumbing system

## WASTE WATER MANAGEMENT

Survey of natural slopes of the locality

Identification of drainage zones of urban/ rural habitations

Detailed survey

Assessment of domestic waste water

Design of sewerage system

Sewage Pumping Station

Sewage treatment plant

Effluent disposal

Industrial fluid conveyance

system (Slurry and waste water)
